Forensic Nursing Certification Board (FNCB)

**FNCB CERTIFICATION
2023 TESTING IS OPEN!**

Take Control of Your Forensic Nursing Career Path Today!

Applications accepted January 1 - September 31
Remaining Testing Windows: April 1-30, July 1-31, October 1-31

WHY IS FORENSIC NURSING CERTIFICATION IMPORTANT?

Forensic Nursing Certification signifies mastery of specialty knowledge necessary for application of science to practice. When certified, the credentials demonstrate to the community of stakeholders your commitment to excellence in forensic nursing.

WHAT FNCB CERTIFICATIONS ARE AVAILABLE?

There are two forensic nursing certifications available from FNCB:

- Generalist Forensic Nurse - Certified™ (GFN-C)
- Advanced Forensic Nurse - Certified™ (AFN-C)

The FNCB Generalist and Advanced Forensic Nursing Certifications are based on: nursing education and licensure, Lynch's Conceptual Framework (1991; includes three pillars - Legal, Forensic Science, and Nursing), Forensic Nursing Core Competencies (2021), and evidence-based content required for forensic nursing practice.

Eligibility for these exams differs based on your educational preparation, licensure, and experience. Details can be found at: <https://goforensicncb.org/certification-types>

ARE THERE DISCOUNTS ON EXAM FEES?
Yes, discounts are available for Academy of Forensic Nursing (AFN) members!
To join, visit: www.goafn.org

Academy of Forensic Nursing Membership

Founded in 2018, the Academy of Forensic Nursing (AFN) has worked to improve and advance the field of forensic nursing. The organization's leadership aims to continue developing the practice with well-researched, evidence-based, trauma-informed care and techniques. The Academy brings together nursing providers, nurse practitioners, educators, researchers, and nurse advocates to provide education, research, networking, and career advancement. Some key methods of disseminating this information include conferences, webinars, podcasts – and, now, the Journal of the Academy of Forensic Nursing. AFN encourages all professionals who support those affected by trauma to be a part of this effort, both receiving and contributing to this critical source of forensic nursing information.
